

MONKEYPOX

Monkeypox Vaccine (JYNNEOS) Eligibility

Phase 2 | Updated Sept. 6, 2022

The Oklahoma State Department of Health (OSDH) has expanded the eligibility criteria of the JYNNEOS vaccine to the following:

Post-Exposure Prophylaxis (PEP)

Vaccination after known or presumed exposure to monkeypox.

- Skin-to-skin contact with a person diagnosed with monkeypox.
- Sex or other skin-to-skin contact at an event/venue in which monkeypox cases have been linked.

Pre-Exposure Prophylaxis (PrEP) and Expanded Post-Exposure Prophylaxis (PEP++)

Vaccination prior to or after possible exposure to monkeypox.

- Anyone who identifies as a gay or bisexual man, man who has sex with men, or transgender person and has engaged in the following within the past 14 days or plans to engage in these activities in the near future:
 - Sex with two or more partners.
 - Sex at a commercial sex venue.
 - Sex in association with an event or venue.
 - Sex in a geographical area where monkeypox is circulating in the community at high levels.
